Ravenskull

BBC Micro Version

Each level is 64 times the size of the screen, and there is an initially-bewildering variety of game characters including: acid pools, man-eating plants, time-doors, keys, pick-axes, scythes, spades, bows and arrows, dynamite, bells, food and wine (beware! it may be poisonous or have strange side-effects).

"Ravenskull is a very good game and is destined to become another Superior classic." . . . ACORN USER.

GRAND PRIX CONSTRUCTION SET

The Ciruit Designer

Grand Prix Construction Set is a motor-racing game with a difference: it allows you to design your own race circuits — using straights, fast bends, sharp bends, chicanes and hump back bridges. Or you can select one of the many pre-defined race tracks, which include most of the world's famous Grand Prix venues.

"As a whole the package is excellent . . . a very appealing software release that is going to give a great many of you a great deal of pleasure." . . . COMPUTER GAMER.

Around the World in 40 Screens

BBC Micro Version

After the release of Repton 3, we were overwhelmed with requests for us to publish another set of screens for the game. We have now produced 40 new screens which, although enticingly amusing, are even trickier to complete than the original 24 screens of Repton 3.

These new screens feature Repton voyaging around the world, visiting America, the Arctic, the Orient, the Oceans and Africa.
